IceWave is specifically designed to provide relief at the source of aches, pains, and discomfort without drugs, stimulants, or chemicals.

How to use

- Apply the patch to clean dry skin.
 1. White patch on the right, tan one on the left.
 2. Alternatively, tan patch on central point of pain and white on end point.
- May be worn for 24 hours at a time. Take 1-2 days off for every 5 full days of use.
- Stay well hydrated.

How it works

The non-transdermal patch contains a mesh lattice made of organic materials that reflect your body heat in the form of a precisely modulated low level infrared light.

Various wavelengths of light are reflected back into the body which signal the body to activate a specific peptide occurring naturally in the body. This enables the body to revert to a more youthful state through cellular regeneration, energy flow and other restorative changes.
